

Programmes for eradication, control and surveillance of animal diseases and zoonoses submitted for obtaining EU financial contribution

Annex IV: Programme for the surveillance of Avian Influenza in poultry and wild birds

Member States seeking an EU financial contribution for national programmes of eradication, control and surveillance shall submit online this document completely filled out by the 31 May of the year preceding its implementation (Art. 2 of Decision (EU) 2015/2444 and Art. 12 of Regulation (EU) No 652/2014).

For multiannual programmes already approved, this document shall also be filled out and submitted after selection of the options:

This programme is multiannual: "YES"

"Funding request for subsequent year of already approved multiannual programme"

If encountering difficulties:

- concerning the information requested, please contact SANTE-VET-PROG@ec.europa.eu.

- on the technical point of view, please contact SANTE-BI@ec.europa.eu, include in your message a printscreen of the complete window where the problem appears and the version of this pdf:

Instructions to complete the form:

- 1) You can attach documents (.doc, .xls, .pdf, etc) to complete your report using the button "Add attachments" on the last page of the form.
- 2) Before submitting this form, please use the button "Verify form"(bottom right of each page). If needed, complete your pdf document as indicated.
- 3) When you have finished completing this pdf document, save it on your computer.
- 4) Verify that your internet connection is active and then click on the "Submit notification" button and your pdf document will be sent to our server. A submission number will appear on your document. Save this completed document on your computer for your record.
- 5) For simplification purposes you are invited to submit multi-annual programmes.
- 6) You are invited to submit your programmes in English.

Member state : PORTUGAL

Disease avian influenza in poultry and wild birds

This program is multi annual : yes

Type of submission : Funding request for subsequent year of already approved multiannual prog

Request of Union co-financing from beginning :

2016

To end of

2017

2017 is year 2 of the multi annual program.

7. Costs

7.1 Detailed analysis of the costs

7.1.1 Poultry including ducks, geese and farmed game birds

Please also check the consistency between the numbers mentioned in tables 2.2.1, 2.2.2, 7.2.1, and the information provided in box 2.3 and 2.4. Please comment also the cost-efficiency aspects of the programme

(max. 32000 chars):

(Versão original em português/tradução em inglês abaixo) (Original version in Portuguese/English translation below)

1. Nº total de amostras previstas: 5.325 (4.500 sangue; 825 zaragatoas cloacais/fezes ou orofaríngeas).

ANNEX 4 : Standard requirements for the submission of surveillance programmes for avian influenza in poultry and wild birds

Tal como referido no ponto 2.3 do programa plurianual submetido para 2016-2017, sempre que for possível, as zaragatoas cloacais/fezes ou orofaríngeas referidas acima serão substituídas por amostras de sangue para pesquisa serológica.

2. Nº previsto de testes a efetuar:

. ELISA: 4.500

. Inibição da Hemaglutinação para H5: 93

Considerou-se um valor esperado de 2% de resultados positivos ao teste ELISA sujeitos a HI;

. Inibição da Hemaglutinação para H7: 93

Considerou-se um valor esperado de 2% de resultados positivos ao teste ELISA sujeitos a HI;

. RT-PCR: 211

Dada a possibilidade das amostras poderem ser agrupadas em pools (máximo de cinco), sempre da mesma espécie, data e unidade epidemiológica foi calculado um número aproximado de 211 testes, pelo que o número total de análises a efetuar resulta inferior ao número total de amostras a testar;

. Isolamento do agente: 34

Considerou-se um valor esperado de 4% de amostras sujeitas a isolamento;

. Subtipificação do vírus por RT-PCR, sequenciação e HI: 1

Considerou-se provável um valor de 1% de resultados de isolamento sujeitos a subtipificação.

Tal como referido no ponto 2.3 do programa plurianual submetido para 2016-2017, sempre que for possível proceder à colheita de sangue, os testes RT-PCR referidos acima serão substituídos por testes serológicos.

Translated version in English

1. Total number of samples foreseen: 5.325 (4.500 blood; 825 cloacal swabs/faeces or oropharyngeal swabs).

As noted in section 2.3 of the multiannual programme submitted for 2016-2017, whenever possible the cloacal swabs/faeces or oropharyngeal swabs mentioned above will be replaced by blood samples for serological testing.

ANNEX 4 : Standard requirements for the submission of surveillance programmes for avian influenza in poultry and wild birds

2. Total number of tests foreseen:

. ELISA: 4.500

. HI for H5: 93

An expected value of 2% of positive ELISA test results subject to HI was considered;

. HI for H7: 93

An expected value of 2% of positive ELISA test results subject to HI was considered;

. RT-PCR: 211

Given the possibility to group samples into pools (maximum of five) - always of the same species, date and epidemiological unit - an approximate number of 211 tests was calculated, reason why the total number of tests is less than the total number of samples to be tested;

. Virus isolation: 34

An expected value of 4% of samples subjected to isolation was considered;

. Subtyping of the virus by RT-PCR, sequencing and HI: 1

A value of 1% of isolation results subject to subtyping was considered likely to be made.

As noted in section 2.3 of the multiannual programme submitted for 2016-2017 whenever it is possible to collect blood, the RT-PCR tests mentioned above will be replaced by serological tests.

7.1.2 Wild birds

Please also check the consistency between the numbers mentions in tables 3.2.1, 7.2.2 and the information provided in box 3.3 and 3.4.

(max. 32000 chars):

(Versão original em português/tradução em inglês abaixo) (Original version in Portuguese/English translation below)

ANNEX 4 : Standard requirements for the submission of surveillance programmes for avian influenza in poultry and wild birds

1. Nº de amostras previstas: 540 zaragatoas cloacais (ou fezes) e orofaríngeas e/ou órgãos ou vísceras.

Com base nos resultados finais de 2015 e dados provisórios de 2016, determinou-se que cerca de 80% das aves eram sujeitas a colheita de zaragatoas (cloacais e orofaríngeas), correspondendo os restantes 20% a colheita de órgãos ou vísceras.

2. Nº previsto de testes a efetuar:

. RT-PCR: 540;

. Isolamento do agente: 54

Considerou-se um valor esperado de 10% de amostras sujeitas a isolamento;

. Subtipificação do vírus por RT-PCR, sequenciação e HI: 3

Considerou-se provável um valor de 5% de resultados de isolamento sujeitos a subtipificação.

Tal como previsto no Manual de Diagnóstico (Decisão nº 2006/437/EC), por questões de conveniência prática e financeira, as amostras poderão ser agrupadas em pools (máximo de cinco), sempre da mesma espécie, data e unidade epidemiológica.

Assim, o número total de análises a efetuar poderá resultar inferior ao número total de amostras testadas.

Não está previsto pagamento a entidades externas pela entrega de amostras de aves selvagens. Caso tal venha a acontecer, o programa será atualizado refletindo esta despesa.

Translated version in English

1. Number of samples foreseen: 540 cloacal (or faeces) and oropharyngeal swabs and/or tissues.

Based on the final results of 2015 and provisional data of 2016, it was determined that about 80% of the birds were subject to swab collection (cloacal and oropharyngeal) and the remaining 20% to collection of tissue.

2. Number of tests foreseen:

. RT-PCR: 540;

. Virus Isolation: 54

An expected value of 10% of samples subjected to isolation was considered;

ANNEX 4 : Standard requirements for the submission of surveillance programmes for avian influenza in poultry and wild birds

. Subtyping of the virus by RT-PCR, sequencing and HI: 3

A value of 5% of isolation results subject to subtyping was considered likely to be made.

As laid down in the Diagnostic Manual (Decision 2006/437/EC), for practical and financial convenience, samples may be grouped into pools (maximum of five), always of the same species, date and epidemiological unit.

Thus, the total number of tests to perform may result lower than the total number of samples tested.

There is no payment to external entities for the delivery of samples from wild birds foreseen.

Should this happen, the programme will be updated to reflect this expense.

ANNEX 4 : Standard requirements for the submission of surveillance programmes for avian influenza in poultry and wild birds

7.2 Summary of the annual costs :

7.2.1 Poultry surveillance including ducks, geese and farmed game birds

Detailed analysis of the cost of the programme - poultry

Targets for year **2017**

Laboratory testing			
Methods of laboratory analysis	Number of tests	Indicative unitary test cost (per method) in € (*)	Total cost (€)
ELISA test	4500	3.26	14670

C. Financial information

1. Identification of the implementing entities - financial circuits/flows

Identify and describe the entities which will be in charge of implementing the eligible measures planned in this programme which costs will constitute the reimbursement/payment claim to the EU. Describe the financial flows/circuits followed.

Each of the following paragraphs (from a to e) shall be filled out if EU cofinancing is requested for the related measure.

a) Implementing entities - **sampling**: who perform the official sampling? Who pays? (e.g. authorised private vets perform the sampling and are paid by the regional veterinary services (state budget); sampling equipment is provided by the private laboratory testing the samples which includes the price in the invoice which is paid by the local state veterinary services (state budget))

(max. 32000 chars):

(Versão original em português/tradução em inglês abaixo) (Original version in Portuguese/English translation below)

A colheita de amostras de aves de capoeira é sempre efetuada pelos serviços veterinários oficiais.

No Continente, é efetuada quer por técnicos da DGAV quer por médicos veterinários municipais, no caso das capoeiras domésticas. Nas Regiões Autónomas da Madeira e dos Açores, é efetuada por técnicos das Direções Regionais da Agricultura e Desenvolvimento Rural.

No caso das aves selvagens a colheita de amostras é também efetuada por outras entidades, maioritariamente públicas (ICNF, SEPNA), não sendo pago nenhum valor pela entrega de amostras.

O material e equipamento necessário às colheitas é adquirido pela DGAV, no caso do Continente ou pelas DRADR, no caso das RA.

ANNEX 4 : Standard requirements for the submission of surveillance programmes for avian influenza in poultry and wild birds

Poultry sampling is always carried out by the official veterinary services.

On the Mainland, it is performed either by DGAV personnel or by the municipality veterinarians, in the specific case of backyard flocks.

In the Autonomous Regions of Madeira and Azores, it is carried out by the personnel of the DRADR.

In the case of wild birds sampling is also carried out by other entities, mostly public entities (ICNF, SEPNA), and no value for the delivery of samples is paid.

The material and equipment needed for sampling is acquired by DGAV, in the case of the Mainland or by the DRADR, in the case of the Autonomous Regions.

b) Implementing entities - **testing**: who performs the testing of the official samples? Who pays? (e.g. regional public laboratories perform the testing of official samples and costs related to this testing are entirely paid by the state budget)

(max. 32000 chars):

(Versão original em português/tradução em inglês abaixo) (Original version in Portuguese/English translation below)

Todas as análises são efetuadas pelo INIAV que é um laboratório público do Ministério da Agricultura, Florestas e Desenvolvimento Rural (anteriormente Ministério da Agricultura e do Mar).

Os custos das análises referentes às amostras colhidas no Continente são pagos pela DGAV.

Os custos das análises referentes às amostras colhidas nas Regiões Autónomas são pagos pelo orçamento dos governos regionais.

Translated version in English

All the tests are performed by INIAV which is a public laboratory of the Ministry of Agriculture, Forests and Rural Development (former Ministry of Agriculture and the Sea).

The costs of the tests relating to samples taken in the Mainland are paid by DGAV.

The costs of the tests relating to samples taken in the Autonomous Regions are paid from the budget of the Regional Governments.

ANNEX 4 : Standard requirements for the submission of surveillance programmes for avian influenza in poultry and wild birds

c) Implementing entities - **compensation**: who performs the compensation? Who pays?
(e.g. compensation is paid by the central level of the state veterinary services,
or compensation is paid by an insurance fund fed by compulsory farmers contribution)

(max. 32000 chars):

(Versão original em português/tradução em inglês abaixo) (Original version in Portuguese/English translation below)

Não estão previstas despesas de compensação no presente programa.

No entanto, em caso de foco de GA, as compensações são pagas pelos serviços veterinários centrais, no caso do Continente, ou pelo orçamento dos governos regionais, no caso das RA.

O pagamento de indemnização por animais abatidos está consignado no Decreto-Lei nº 39209 de 14 de maio de 1953, que permite à Autoridade Sanitária e Veterinária (DGAV) determinar o abate sanitário de animais e o pagamento de indemnizações.

Em todos os casos em que se determine o abate sanitário de animais, é elaborado um processo do qual faz parte um auto de abate que serve de base ao processo de indemnização.

No que se refere ao valor de compensação este encontra-se definido no Despacho Conjunto nº 530/2000 de 16 de maio.

Translated version in English

Compensation expenses are not foreseen in this programme.

However in the event of an outbreak of AI the compensations are paid by the central level of the state veterinary services in the Mainland or by the budget of the Regional Governments in the case of the Autonomous Regions.

The payment of compensation for animals slaughtered is foreseen in Decree-Law 39209 from May 14, 1953, allowing the Veterinary Authority (DGAV) to determine the culling of animals and the payment of compensation.

In all cases in which the slaughter of animals is determined a compensation process is made which serves as the basis for compensation.

In all cases where the culling of animals is determined a process, which includes a slaughter testimonial, is made that underlies the compensation process.

The value of this compensation is defined by the Joint Decree 530/2000 of 16 May.

ANNEX 4 : Standard requirements for the submission of surveillance programmes for avian influenza in poultry and wild birds

d) Implementing entities - **vaccination** : who provides the vaccine and who performs the vaccination? Who pays the vaccine? Who pays the vaccinator?

(e.g. farmers buy their vaccine to the private vets, send the paid invoices to the local state veterinary services which reimburse the farmers of the full amount and the vaccinator is paid by the regional state veterinary services)

(max. 32000 chars):

(Versão original em português/tradução em inglês abaixo) (Original version in Portuguese/English translation below)

Não estão previstas despesas de vacinação no presente programa.

No entanto, em caso de necessidade de vacinação contra a GA, a aquisição da vacina é paga pela DGAV, no caso do Continente, ou pelo orçamento dos governos regionais, no caso das RA.

A sua aplicação será sempre feita pelos serviços veterinários oficiais.

Translated version in English

Vaccination expenses are not foreseen in this programme.

However in case of need for vaccination against the AI the acquisition of the vaccine is paid by DGAV, in the case of the Mainland, or by the budget of the Regional Governments, in the case of the Autonomous Regions.

The vaccine application will always be made by the official veterinary services.

e) Implementing entities - **other essential measures**: who implement this measure? Who provide the equipment/service? Who pays?

(max. 32000 chars):

(Versão original em português/tradução em inglês abaixo) (Original version in Portuguese/English translation below)

ANNEX 4 : Standard requirements for the submission of surveillance programmes for avian influenza in poultry and wild birds

Não estão previstas outras medidas essenciais no presente programa.

No entanto, em caso de foco de GA, as ações, equipamentos e meios são providenciados pelos serviços oficiais.

A execução material e financeira é suportada pela DGAV, no caso do Continente, ou pelo orçamento dos governos regionais, no caso das RA.

Translated version in English

Other essential measures are not foreseen in this programme.

However in the event of an outbreak of AI the equipment and resources are provided by the official veterinary services.

Material and financial execution is supported by DGAV, in the case of the Mainland, or by the budget of the Regional Governments, in the case of the Autonomous Regions.

2 Co-financing rate (see provisions of applicable Work Programme)

The maximum co-financing rate is in general fixed at 50%. However based on provisions of Article 5.2 and 5.3 of the Regulation (EU) No 652/2014, we request that the co-financing rate for the reimbursement of the eligible costs would be increased:

Up to 75% for the measures detailed below

Up to 100% for the measures detailed below

ANNEX 4 : Standard requirements for the submission of surveillance programmes for avian influenza in poultry and wild birds

Please explain for which measures and why co-financing rate should be increased to 75% (max 32000 characters)

(Versão original em português/tradução em inglês abaixo) (Original version in Portuguese/English translation below)

3. Source of funding of eligible measures

All eligible measures for which cofinancing is requested and reimbursement will be claimed are financed by public funds.

yes

no
